COASTAL INSPECTION SERVICES

Nothing says summer like a backyard BBQ and some fireworks — but as inspectors, we've seen how quickly fun can turn into fire hazards. Here's a quick safety refresher you can share with your clients before the 4th of July celebrations kick off:

LET'S KEEP IT SAFE !

CLEAR YARD CLUTTER

Dry brush, palm fronds, and even cardboard boxes can become fuel for a rogue spark. Encourage clients to clear around the home — especially near fences, patios, and sheds.

MIND THE ROOF

Leaves and debris in gutters or valleys of the roof? A single spark can ignite it. Remind clients to clean off those rooftops, especially near trees.

KNOW THE LOCAL LAWS

Some areas in SoCal are strictly no-fireworks zones. Help your clients stay safe and legal by checking local firework ordinances and presenting public firework show itineraries.

KEEP PETS INSIDE

Not home-related, but totally worth the PSA — loud booms freak out pets. Keep them safe indoors with white noise or calming support.

EXTINGUISHERS

Basic prep can prevent big disasters. Water nearby + an extinguisher on hand = peace of mind.

From All of Us at **COASTAL INSPECTION SERVICES**
We hope your 4th is full of laughter, good food, and safe celebrations. Thank you for trusting us to keep your transactions (and your clients) protected all year round.
